Project Title: Squirrel Website

I want to build a multi-page website. I think that there is enough content about squirrels to make it work.

https://en.wikipedia.org/wiki/Squirrel

Overview/Homepage: The first paragraph of the page as well as the info in the long box on the right of the page.

Characteristics/ Lifetime: The physical appearance and making of a squirrel as well as their lifespan. The lifespan section is short enough and similar to Characteristics so I lumped them together into one page.

Behavior: What squirrels do.

Etymology/Taxonomy: Two sections combined again about the naming and organization of squirrels.
